

Introduction to Department of Academic Quality (DAQ)

The Department of Academic Quality provides professional support to the University, to assure the quality of academic provision and to promote good practice leading to enhancement.

Key responsibilities:

- ☐ **Ensuring the University adheres to internal and external quality management requirements.**
- ☐ **Keeping ourselves and others informed of national developments in quality management.**
- ☐ **Working with faculties to identify and disseminate good practice.**
- ☐ **Raising awareness of quality management policy and procedures amongst central departments and faculties, through briefing sessions and publications.**

DMU's key values include a commitment to work in the wider community and to promote widening participation. The University's collaborative activity (specifically the UK provision) is therefore an important strand of the University's operation. The University has strong network partnerships, most of which have been developed over a long period of time.

Details of the University's collaborative partnerships and provision along with the Department of Academic Quality's Guide to Managing Collaborative Provision and other related documents can be found by following the link below:
